

# METAL PROTECTIVE FILM

## The Best Protective Film for Sandwich Panels

Motisan Metal surface protective film is a PE protective film specifically designed for metal surface protection, primarily used for sandwich panels throughout their product life cycle.

Developed with holistic thinking, our double-anti film is not only easy to unwind and laminate, offering a 6-month outdoor guarantee, but also ensures excellent easy-to-peel performance after on-site installation.

### Anti-Aging & UV-Resistant

With the incorporation of anti-aging agents and UV stabilizers, our protective film provides long-lasting outdoor protection. It remains durable and easy to peel off even after prolonged outdoor exposure, without leaving any residue. The film comes with a 6-month outdoor guarantee.

### Printable

This film is printable, allowing you to print your logo, boosting your business image and brand recognition.

### Easy Peel

Thanks to our specially formulated adhesive, these easy-peel films adhere flawlessly to metal surfaces throughout all stages of production. They can be swiftly and easily removed at the end of the cycle, leaving no adhesive residue. This maximizes product protection and results in significant labor cost savings.

### Customizable

Our technical team can perform surface analysis and customize the film to meet your specific needs.

## SPECIFICATIONS

**Available length** 200-2000 m

**Width** 500 -1300 mm
