

UniDoor

Pre-hung Design with Box Section frame

3-side frame with Auto Drop-Down Bottom Seal

For both Internal & External Application use

Compatible with different wall thickness

Motisan Steel UniDoor are designed and engineered in Australia to meet Australian standards and requirements. These pre-hung steel doors feature an integrated structural design, allowing for easy installation in various wall systems, such as insulated panels, steel frames, and brick walls.

Integrated Structural Design

Cleanroom door design with a seamless, weld-free finish for easy cleaning and no dust collection.

Wall Compatibility

Compatible with wall thicknesses of $\geq 50\text{mm}$.

Airtightness

Rebate door leaf design equipped with continuously PU foam sealing and an automatic bottom seal for strong airtightness.
